FLAPS1 Measurement of BG Aerosol with Nichia Light Source (12 mw) 0.05% BG Slurry Using a Spinning Disk Generator Comparison with Reference Data

Fig. 4

FLAPS1 Measurement of BG Aerosol with Nichia Light Source (12 mw) 0.05% BG Slurry Using a Spinning Disk Generator High Resolution Comparison with Reference Data

Fig. 5

Downloaded from ascelibrary.org by Seattle University on 06/06/15

Comparison of Three Generations of Detector Technologies BG Aerosol Generated by Spinning Disk with 0.5% Slurry

Fig. 6a

Comparison of Normalised FLAPS1 Fluorescent Data

Fig. 6b

Spearman Rank Order Correlation Test

Correlation Coefficient = 0.86

Normality Test (Kolmogorov-Smirnov)

FLAPS1:K-S Dist. = 0.154 $P < 0.001$ Failed

FLAPS2:K-S Dist. = 0.145 $P < 0.001$ Failed
